MAKERSPACE

Calling all K-1 Makers, Creators, Inventors!

You are invited to the STEM Lab for **Makerspace**! Each Thursday, from **8:00-8:40**, kindergarten and first graders are invited to the STEM Lab located in the library to make and create using a sea of materials: pipe cleaners, craft sticks, recyclable materials, model magic, K'Nex and so much more!

This time and space is designated to ignite **curiosity**, practice **problem solving , perseverance**, and cultivate **creativity**!

Each month, there will be a different making theme to spark your child's ideas **OR** they can create from their own imagination! Our Makerspace theme is **GO! GO! GO!** focusing on creating vehicles out of 3 or more materials.

Families, if your child is interested in Makerspace, please fill out the form linked here or use the QR code below by noon on September 16th. To prioritize health and safety, there will be a limited number of slots. If demand exceeds our limited number of slots, a lottery will be held. Makerspace will begin on Thursday, September 23rd.

Feel free to e-mail me with any questions, concerns, or ideas!

I can't wait to use our engineering skills to create!

All that's missing is YOU!

SO many space to create in!

So many materials to use!
